

**RUSSIAN ACADEMY OF SCIENCES  
DOKLADY. MATHEMATICS**

Volume 45, Number 1

July-August 1992

**CONTENTS**

Boimatov, K. Kh. <i>Spectral asymptotics of <math>m</math>-sectorial operators</i> .....	1
Gaishun, I. V. and Khoang Van Kuang [Hoang Van Quang] <i>Solvability of a class of operator equations and controllability of Roesser systems</i> .....	7
Golubyatnikov, V. P. <i>Questions of stability in recovering certain compact sets from their projections</i> .....	12
Dzhangibekov, G. <i>On a class of two-dimensional singular integral operators with several fixed singularities</i> .....	15
Zubov, V. I. <i>Analytic representation of motions that are Poisson stable</i> .....	21
Iskhokov, S. A. <i>A variational Dirichlet problem for an elliptic system of differential operators degenerate on the boundary</i> .....	26
Kurta, V. V. <i>On Phragmén-Lindelöf theorems for semilinear equations</i> .....	31
Merzlyakov, Yu. I. <i>On Kargapolov groups</i> .....	34
Runovskii, K. V. <i>On approximation in an "angle" in <math>L_p</math> spaces, <math>0 &lt; p &lt; 1</math></i> ....	38
Savina, T. V., Sternin, B. Yu., and Shatalov, V. E. <i>On the reflection law for the Helmholtz equation</i> .....	42
Karatsuba, A. A. <i>On the distribution of real zeros of the function <math>\zeta(\frac{1}{2} + it)</math></i> ....	46
Korenevskii, D. G. <i>On asymptotic stability of solutions of systems of linear deterministic and stationary stochastic difference equations with delay</i> .....	48
Kudryavtsev, L. D. <i>On stabilization boundary value problems</i> .....	53
Lizorkin, P. I. and Rustamov, Kh. P. <i>On some equivalent normings of a Nikol'skii-Besov space on the sphere</i> .....	58
Miklyukov, V. M. <i>On a Lorentz-invariant characteristic of maximal tubes in Minkowski space</i> .....	63
Nguyen Tien Kkhiem [Nguyen Tien Khiem] <i>Conditions for the existence of a steady-state solution of the Fokker-Planck-Kolmogorov equation in amplitude and phase variables for nonlinear oscillatory systems</i> .....	67
Platonov, S. S. <i>Invariant subspaces in some function spaces on symmetric spaces of rank 1. Symplectic and exceptional cases</i> .....	73
Tkachenko, V. A. <i>Spectral analysis of a nonselfadjoint Hill operator</i> .....	78
Ul'yanov, P. L. <i>On absolute convergence of trigonometric Fourier series</i> .....	83
Khusainov, A. A. <i>On the Hochschild-Mitchell dimension of the number line</i> ...	89
Shchan'yui Chzhou [Xiang-Yu Zhou] <i>On orbital convexity of domains of holomorphy invariant under a linear action of tori</i> .....	93

Boimatov, K. Kh. <i>Spectral asymptotics of linear and nonlinear pencils of pseudodifferential operators that are elliptic in the Douglis-Nirenberg sense ...</i>	99
Bryuno [Bruno], A. D. <i>Smooth linearization of differential equations .....</i>	105
Gurvich, V. A. <i>Information extensions of game forms .....</i>	110
Zubov, V. I. <i>Differential equations of evolution of forms .....</i>	115
Kaplan, A. A. and Tikhachke [Tichatschke], R. <i>Adaptive methods of solving ill-posed semi-infinite convex optimization problems .....</i>	119
Kapustin, N. Yu. <i>On a property of generalized analytic functions .....</i>	124
Larin, V. B. <i>Construction of a nonnegative definite solution of the Lyapunov equation .....</i>	129
Makin, A. S. <i>On Riesz means of biorthogonal expansions in root functions of nonselfadjoint extensions of the Schrödinger operator .....</i>	132
Sabitov, K. B. <i>An alternating method of Schwarz type in the theory of equations of mixed type .....</i>	136
Aiite [Ayite], A. <i>Meromorphic and holomorphic functions that generate normal families on an arbitrary group of conformal automorphisms of the disk ...</i>	141
Berkovich, L. M. <i>Transformations of variables as a method of finding exact invariant solutions of the Kolmogorov-Petrovskii-Piskunov equation and related nonlinear heat equations .....</i>	146
Bogachev, K. Yu. <i>Iterative methods of solving quasilinear elliptic problems in domains of complicated shape .....</i>	152
Mikhailov, L. G. <i>On the theory of total differentials with singular points .....</i>	157
Berkovich, L. M. <i>Factorization as a method of finding exact invariant solutions of the Kolmogorov-Petrovskii-Piskunov equation and the related Semenov and Zel'dovich equations .....</i>	162
Gurvich, V. A. <i>Positional structures and chromatic graphs .....</i>	168
Gusev, M. I. <i>On the structure of optimal minimax estimates in problems of guaranteed estimation .....</i>	173
Islamov, G. G. <i>On an upper estimate of the spectral radius .....</i>	177
Krasovskii, A. N. <i>A differential game for a positional functional of the phase coordinates and control actions .....</i>	180
Melikov, T. K. <i>Recurrence conditions for optimality of singular controls in systems with delay .....</i>	184
Monakhov, V. N. and Seleznev, V. A. <i>Dynamical systems determining quasiconformal mappings .....</i>	189
Nikol'skii, M. S. <i>On a linear problem of tracking motion .....</i>	193
Samoilenko, A. M. and Glavan, V. A. <i>Linear almost periodic systems admitting an almost periodic orthogonalization process .....</i>	198
Statulyavichus [Statulevičius], V. A. and Sidoravichyus [Sidoravičius], V. <i>Convergence to a Poisson law on CCR and CAR algebras .....</i>	202
Askhabov, S. N. and Karapetyants, N. K. <i>Discrete equations of convolution type with a monotone nonlinearity in complex spaces .....</i>	206
Bilalov, B. T. <i>A necessary and sufficient condition for the completeness and minimality of a system of the form <math>\{A(t)\varphi^n(t); B(t)\overline{\varphi}^n(t)\}</math> .....</i>	211

Bloshanskii, I. L. <i>The exact Weyl multiplier for the validity of generalized localization on any open sets for rectangularly summed three-dimensional Fourier series</i> .....	215
Bryuno [Bruno], A. D. <i>On conditions for nondegeneracy in Kolmogorov's theorem</i> .....	221
Rudzkis, R. <i>Probabilities of large excursions of empirical processes and fields</i> ..	226
Umarov, S. R. <i>On well-posedness of boundary value problems for pseudodifferential equations with analytic symbols</i> .....	229
Table of Contents for the next issue (Vol. 45, No. 2, September-October 1992, Russian original Tom 323, nos. 1-6) .....	233-a

Volume 45, Number 2

September-October 1992

# CONTENTS

V. A. Baltag and N. I. Vulpe, <i>Number and multiplicity of singular points of a quadratic differential system</i> .....	235
N. S. Bakhvalov and M. È. Èglit, <i>On the propagation speed of perturbations in microinhomogeneous elastic media with small shear modulus</i> .....	239
V. A. Gurvich, <i>Algebraic properties of effectivity functions</i> .....	245
B. Yu. Sternin and V. E. Shatalov, <i>Fourier-Maslov integral operators associated with a bundle, and an extension of the algebra of pseudodifferential operators</i> .....	252
A. I. Subbotin, <i>Continuous and discontinuous solutions of boundary value problems for first-order partial differential equations</i> .....	257
V. Ya. Yakubov, <i>Unboundedness of normalized vector-valued functions of Dirac-type systems</i> .....	262
Sh. Yarmukhamedov, A. Abdukarimov, and Z. Malikov, <i>On the Cauchy problem for first-order elliptic systems</i> .....	266
I. I. Bavrin and G. N. Bakunin, <i>Ballisticity of continuous functions</i> .....	269
A. P. Buslaev, <i>On Bernstein-Nikol'skii inequalities and widths of Sobolev function classes</i> .....	272
S. A. Vavilov, <i>Geometric methods of studying the solvability of a class of operator equations</i> .....	276
È. M. Galeev, <i>On Bernstein-Nikol'skii inequalities that are best with respect to choice of harmonics</i> .....	281
S. Sh. Galstyan, <i>On convergence and unconditional convergence of Fourier series</i> ..	286
I. E. Egorova, <i>On a class of almost periodic solutions of the KdV equation with nowhere dense spectrum</i> .....	290

V. N. Kolokol'tsov, <i>The stochastic Bellman equation as a nonlinear equation in Maslov spaces. Perturbation theory</i> .....	294
A. A. Korenovskii, <i>The reverse Hölder inequality, the Muckenhoupt condition, and equimeasurable rearrangements of functions</i> .....	301
V. E. Maïorov, <i>Widths of spaces endowed with a Gaussian measure</i> .....	305
K. V. Runovskii, <i>On approximation by algebraic polynomials in <math>L_p</math>-spaces, <math>0 &lt; p &lt; 1</math></i> .....	310
V. I. Ryazanov, <i>On necessary and sufficient conditions for Belinskii differentiability</i> .....	313
B. Yu. Sternin and V. E. Shatalov, <i>On a class of nonlocal elliptic problems</i> ....	317
M. M. Khapaev, <i>Singular differential equations in problems of the study of functions at a conditional extremum</i> .....	322
V. V. Aseev, <i>On the Möbius property of topological imbeddings preserving conformal moduli</i> .....	325
A. G. Baskakov, <i>On splitting a differential operator with unbounded operator coefficients</i> .....	329
Yu. Ya. Belov, <i>An inverse problem for the Burgers equation</i> .....	334
Yu. V. Gavrilenko, <i>Congruences on terms and properties of dependence relations between variables</i> .....	338
I. M. Gel'fand, M. I. Graev, and V. S. Retakh, <i>Generalized hypergeometric functions associated with an arbitrary finite or locally compact continuous field</i> .....	343
A. I. Gol'berg and V. A. Gurvich, <i>A tightness criterion for reciprocal bipartite cyclic game forms</i> .....	348
I. M. Dektyarev, <i>A new concept of defect for holomorphic curves</i> .....	355
M. I. Imanaliev and S. N. Alekseenko, <i>On the theory of nonlinear integro-partial differential equations of Whitham type</i> .....	360
F. G. Maksudov, È. M. Bairamov, and R. U. Orudzheva, <i>The inverse scattering problem for an infinite Jacobi matrix with operator elements</i> .....	366
V. A. Malyshev, <i>Differential inequalities and Hadamard's conjecture</i> .....	371
V. V. Napalkov and I. Kh. Musin, <i>A description of analytic functionals in certain classes of domains</i> .....	375
S. L. Èdel'shtein [Edelstein], <i>Asymptotic splitting of boundary value problems for differential equations in Banach spaces</i> .....	379
M. Z. Berkolaiko and I. Ya. Novikov, <i>Bases of wavelets in spaces of differentiable functions of anisotropic smoothness</i> .....	382
S. B. Vakarchuk, <i>On widths of some classes of entire transcendental functions of several complex variables</i> .....	387
A. Dzhuraev, <i>On degenerate systems of first-order partial differential equations</i> .....	391
A. A. Dosiev, <i>A block-grid method for increasing accuracy in the solution of the Laplace equation on polygons</i> .....	396
V. I. Zubov, <i>The evolutionary development of forms is independent of aftereffects</i> .....	400
A. S. Monin, <i>On jointly orthogonal expansions of multicomponent random functions</i> .....	403

A. V. Abanin, <i>Geometric criteria for representation of analytic functions by series of generalized exponentials</i> .....	407
N. V. Balashevich, R. Gabasov, and F. M. Kirillova, <i>Synthesis of adaptive optimal controls for linear dynamical systems</i> .....	412
V. A. Derkach and M. M. Malamud, <i>Characteristic functions of linear operators</i> .....	417
O. S. Kozlovskii, <i>The dynamics of intersections of analytic manifolds</i> .....	425
Yu. F. Korobeinik and S. N. Melikhov, <i>A continuous linear right inverse for a representation operator, and conformal mappings</i> .....	428
M. A. Mamedov, <i>Turnpike theorems in continuous systems with integral functionals</i> .....	432
A. M. Nakhushev, <i>The effect of localization of the singularity of the gradient of the solution of Darboux's problem for the Gellerstedt equation, and a criterion for its continuity</i> .....	436
G. I. Osmanov, <i>On absolute convergence of the Fourier integral in <math>R_n</math></i> .....	441
E. V. Radkevich, <i>The dynamic angle problem for the Gibbs-Thomson law</i> ....	444
V. A. Sharafutdinov, <i>The quasi-isotropic approximation of geometric optics and problems of tomography</i> .....	450
V. D. Budaev, <i>The unconditional basis property for systems of root vector-valued functions of differential operators with matrix coefficients</i> .....	454
V. V. Vedenyapin, <i>On the classification of steady-state solutions of Vlasov's equation on the torus, and a boundary value problem</i> .....	459
V. A. Gorelov, <i>On systems consisting of a finite and an infinite number of root functions of different boundary value problems</i> .....	463
A. A. Dezin and N. G. Marchuk, <i>Perturbation of periodicity conditions in the simplest nonlinear model</i> .....	467
V. I. Zubov, <i>The ergodic behavior of the distribution functions of probabilistic processes</i> .....	470
A. V. Knyazev and A. L. Skorokhodov, <i>Iterative methods of gradient type in a subspace for a partial symmetric generalized eigenvalue problem</i> .....	474
L. D. Kudryavtsev, <i>On the solutions of ordinary differential equations the integrals of whose derivatives converge conditionally</i> .....	479
O. V. Mingalev, <i>On solutions in the form of a traveling wave in a discrete model of the Uehling-Uhlenbeck equation</i> .....	484
S. V. Nepomnyashchikh, <i>The method of partitioning the domain for elliptic problems with jumps of the coefficients in thin strips</i> .....	488
O. G. Smolyanov and E. T. Shavgulidze, <i>The support of the symplectic Feynman measure, and the uncertainty principle</i> .....	492
V. V. Filippov, <i>On stationary points and some geometric properties of solutions of ordinary differential equations</i> .....	497
Table of Contents for the next issue (Vol. 45, No. 3, November-December 1992, Russian original Tom 324, nos. 1-6) .....	501-a

## CONTENTS

V. V. Al'sevich, R. Gabasov, and F. M. Kirillova, <i>An optimal regulator for linear systems with delays under finite-dimensional terminal constraints</i> .....	503
A. G. Baskakov and Chan Khy-u Bong [Tran Huu Bong], <i>On almost-periodicity of solutions of linear functional equations</i> .....	509
V. V. Ditkin, <i>On the root subspaces of a two-parameter spectral problem</i> .....	513
P. P. Zabreiko and Nguen Van Min' [Nguyen Van Minh], <i>The group of characteristic operators and its applications in the theory of linear ordinary differential equations</i> .....	517
V. N. Kolokol'tsov and V. P. Maslov, <i>Bellman's differential equation and Pontryagin's maximum principle for multicriteria optimization problems</i> ....	522
È. R. Korepanov, <i>Discrete conditionally optimal filters with memory</i> .....	528
A. A. Martynyuk, <i>On multistability of motion with respect to some of the variables</i> .....	533
I. V. Mingalev, <i>On global solvability of the Cauchy problem for discrete models of the Uehling-Uhlenbeck equation</i> .....	537
V. N. Monakhov and V. A. Seleznev, <i>On certain properties of quasiconformal dynamical systems in the large</i> .....	541
I. N. Sinitsyn and V. I. Shin, <i>Conditionally optimal filtering of processes in stochastic differential systems with autocorrelated noise in the observations according to complex statistical criteria</i> .....	545
A. A. Borovkov, <i>On ergodicity of iterations of random Lipschitz transformations</i> .....	551
S. Dzhumayev and È. Mukhamadiev, <i>On the question of regularization of operator equations</i> .....	556
V. M. Evtukhov, <i>Asymptotic representations of monotonic solutions of a nonlinear <math>n</math>th order differential equation of Emden-Fowler type</i> .....	560
V. A. Marchenko, <i>Characteristic properties of Weyl solutions</i> .....	563
S. M. Nikol'skii, <i>Approximation by entire functions of exponential type in the metric of a Banach space</i> .....	567
V. I. Burenkov and V. A. Gusakov, <i>On precise constants in Sobolev imbedding theorems. II</i> .....	572
N. S. Dairbekov, <i>The concept of a quasiregular mapping of several <math>n</math>-dimensional variables</i> .....	578
P. P. Zabreiko and Nguen Van Min' [Nguyen Van Minh], <i>Exponential dichotomy and integral manifolds in the theory of flows, and their applications</i> .....	583
V. I. Lebedev and A. L. Skorokhodov, <i>Quadrature formulas of orders 41, 47, and 53 for the sphere</i> .....	587
S. S. Marchenkov, <i>On maximal subalgebras in products of the iterative Post algebras <math>\mathfrak{P}_2</math> and <math>\mathfrak{P}_3</math></i> .....	593
S. M. Nikol'skii, <i>On a method for approximating functions by polynomials on a manifold</i> .....	597
A. A. Salimov, <i>Almost <math>\psi</math>-holomorphic tensors and their properties</i> .....	602

A. Kh. Begmatov, <i>Problems of integral geometry and special operator equations of Volterra type</i> .....	606
O. A. Dolotova, <i>On the complexity of minimal verifying tests for Post classes</i> ..	610
V. V. Zhuk and G. I. Natanson, <i>On approximation of functions on standard simplexes</i> .....	614
M. M. Zavolzhenskii and V. A. Nogin, <i>An approximation approach to the inversion of generalized Riesz potentials</i> .....	619
V. L. Makarov and V. V. Khlobystov, <i>Polynomial interpolation of operators in Hilbert spaces</i> .....	624
E. V. Radkevich, <i>The problem of a dynamic angle for the Verigin-Muskat problem</i> .....	629
K. S. Fayazov, <i>An ill-posed Cauchy problem for a differential equation with operator coefficients</i> .....	635
I. G. Tsar'kov, <i>Theorems on global existence of an implicit function, and their applications</i> .....	638
Chan Khy-u Bong [Tran Huu Bong], <i>On the Fredholm property for linear functional-differential operators</i> .....	641
V. V. Shelukhin, <i>The problem of predicting the temperature of the ocean from average data over a preceding period of time</i> .....	644
I. V. Zhuravlev, <i>On the existence of a homeomorphic solution for a multidimensional analogue of the Beltrami equation</i> .....	649
E. L. Korotyaev, <i>The method of Enss, taking account of anisotropy</i> .....	653
V. S. Mel'nik, <i>On T-differentiable functionals</i> .....	659
M. D. Ramazanov, <i>Universal optimality of lattice cubature formulas</i> .....	665
Kh. P. Rustamov, <i>On characterization of fractional powers of the Beltrami-Laplace operator on the sphere with the help of fractional finite differences</i> .....	670
K. N. Soltanov, <i>Solvability of nonlinear equations with operators of the form of the sum of a pseudomonotone and weakly compact operator</i> .....	676
V. P. Maslov and S. N. Samborskii, <i>Existence and uniqueness of solutions of the steady-state Hamilton-Jacobi and Bellman equations. A new approach</i> ...	682
F. Kh. Mukminov, <i>On the rate of decay of a solution of a mixed problem for the Navier-Stokes system of equations in a domain with noncompact boundary</i> .....	688
M. A. Sadybekov and E. M. Orynbasarov, <i>The basis property for a system of root functions of a boundary value problem with displacement for the Lavrent'ev-Bitsadze equation</i> .....	692
A. L. Skubachevskii, <i>Boundary value problems for differential-difference equations with incommensurable shifts</i> .....	695
V. G. Sutyrin, <i>The minimal surface separating equal regions in space, or the structure of an ideal dry foam</i> .....	700
M. M. Khapaev, <i>Singular differential equations in control problems with constraints</i> .....	706
Table of Contents for the next issue (Vol. 46, No. 1, January-February 1993, Russian original Tom 325, nos. 1-6) .....	709-a
